

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! The flat-fee is not fair to "we, the people", the little people that you might say gets dumped over and over again.

We are the more numerous and a small raise could bring in a lot of money, and this would be an easy way out; however, it is not the fair/right way.

Sincerely, Jack & Marie Sumner, Route 4, Wrightsville, GA 31096

Sincerely,

Jack & Marie Sumner
